strategic models	<p>Basic Overview of Various Strategic Planning Models</p> <p><a href="http://www.managementhelp.org/plan_dec/str_plan/models.htm">http://www.managementhelp.org/plan_dec/str_plan/models.htm</a></p>
	<p>Source:</p> <p><a href="http://www.allianceonline.org/FAQ/strategic_planning/what_is_strategy_and.faq">http://www.allianceonline.org/FAQ/strategic_planning/what_is_strategy_and.faq</a></p> <p>"Strategies are simply a set of actions that enable an organization to achieve results." MAP for Nonprofits, St. Paul, MN</p> <p>"Strategy is a way of comparing your organization's strengths with the changing environment in order to get an idea of how best to complete or serve client needs." Jim Fisk &amp; Robert Barron, <i>The Official MBA Handbook</i></p> <p>Essentially, there are three different categories of strategies: organizational, programmatic, and functional. The difference among the categories is the focus of the strategy:</p> <p><b>Organizational strategy</b> outlines the planned avenue for organizational development (e.g., collaborations, earned income, selection of businesses, mergers, etc.).</p> <p><b>Programmatic strategy</b> addresses how to develop, manage and deliver programs (e.g., market a prenatal care service to disadvantaged expectant mothers by providing information and intake services in welfare offices).</p> <p><b>Functional strategies</b> articulate how to manage administration and support needs that impact the organization's efficiency and effectiveness (e.g., develop a financial system that provides accurate information using a cash accrual method).</p>
